Battlefield: Bad Company 2

Hint: Spotting Enemies

You have to aim at someone that is not on your team, and if you cant kill him, press the select button.

Hint: XP Farming

Note: This requires a cooperative second player. Choose Hardcore Mode and become a medic. Find a safe spot and kill and revive your friend with the defibrillator repeatedly. You get 80 points each time but you lose 15 for team killing.

Addition by *Joel*: Go to one of the areas where it will tell you that you're leaving the combat zone. Have someone walk out there and when they die run in and revive them with you defib paddles. You get 80 points and it doesn't take 15 points away for team killing.
